

2024

To Whom It May Concern:

Subject: LEED Version 4.1 Building Design + Construction (BD+C)
Category: MR Credit: Sourcing of Raw Materials

Below is the LEED Credit information for the various Argos products manufactured at our Atlanta, Georgia plant Facility.

Atlanta Plant at 2520 Paul Avenue, Atlanta, GA 30318

- Atlanta EcoStrong PLC Type IL HE Cement, ASTM C595 contains **34.1%** pre-consumer material.
- Atlanta Masonry cements (custom color) ASTM C91 – upon request.
- Atlanta Cement Lime (Eaglebond®), ASTM C150 or C595 and C207 – upon request.
- Atlanta Mortar cements (Superbond™) ASTM C1329 – upon request.

Per LEED V4.1 (BD+C); The formula for determination of recycled content is as follows:

$$[% \text{ Pre-Consumer} * 50\%] + [% \text{ Post Consumer} * 100\%] * \text{Cost of Material}$$

Credit achievement calculation information:

These products are manufactured at 2520 Paul Avenue, Atlanta, GA 30318. Utilize this address to determine sourcing distance from project site.

If you have any questions about the content of this letter or require additional information, please contact your local Argos representative, the Customer Value Center at 1-800-331-0022 or email argos-communications@argos-us.com
